Coverage MST (100 marks)

- week 1-5 labr
- week 1-7 coverage.

Alternative to
Table → flexbox
→ grids.

- Complete URLs.
- Navigation (theory based)
- XHTML transitional
- HTML5
- CSS for navigation (css writing)
- ASP.NET code.
- HTML entities (e.g non-breaking space) and emoji's.
- Commonly used HTML entities.

→ objects from toolbox.

- FullName
- Password
- CheckBox
- Dropdown List
- Textbox

- How ASP.NET look like in XHTML.
- ASP.NET → XHTML (codes)

- used for
tabular
data. →
- semantic elements.
 - Accessibility of elements.
 - Table Accessibility feature - captions.
 - don't use tables to build structure.
 - 5 moves for validation and correction.
 - HTTP request → static & dynamic web page.

Accessibility for table is caption. Do not use table for layout..only for tabular data.

Alternative to table can be grids or flexbox for layout.

Correcting errors...5 rules for validation.

Http request...static and dynamic web page difference....lab 1.
